

## GHX Service

Extensive training and experience assure you that the GHX Sales Staff is fully qualified to aid in servicing your fluid sealing and transfer needs. Country-wide 24 hour hot lines to our major suppliers assure that engineering advice assistance is available wherever and whenever needed.

GHX also provides in-plant seminars to keep our customers up to date with new products and installation procedures.

Whatever you need, be it rush delivery, application engineering consulting, in-plant training seminars or creative inventory management systems, GHX is poised and ready to respond as your **single source solution** to fluid sealing and transfer requirements.

**Prompt Response To  
Your Emergency Needs**

International  
Organization for  
Standardization

## GHX Locations

In addition to on-time delivery of what would be considered "normal" every day orders, GHX supports our customers with 24-hour, 7day emergency service. When the unexpected happens, GHX can always be counted on to do whatever it takes to get you up and running ASAP, any time of the day or night.

# The Company—Advanced Technology with Exceptional Service

**GHX—Where Quality is a Matter of Facts**

GHX is an innovative value-added distributor of a full range of Industrial Sealing and Fluid Transfer Products. Our coast-to-coast inventories include rubber, metal, composite and hydraulic hose assemblies fabricated at all GHX locations. Gasketing Materials, covering the broad spec-

trum of flange applications in the process and other industries, are made to order as customer needs arise. Packings, expansion joints, O-rings, hose fittings and textile products enable GHX to provide outstanding service to our customers, no matter how large or small their sealing needs.

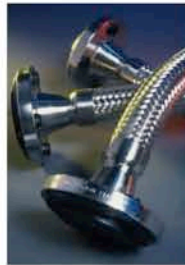

Extensive product knowledge and manufacturing expertise, in conjunction with comprehensive inventories and strong working relationships with major quality manufacturers, provide GHX customers the assurance that they are being served by one of the best in the industry.

To facilitate the movement of customer orders through the GHX Quality Production System and to meet the challenges of today's MRO (Maintenance, Repair, and Operations) marketplace, we have installed state-of-the-art computerized systems to maximize efficiency and assure on time delivery.

GHX welcomes the opportunity to demonstrate how we can serve you.

## GHX Quality Process

Production time is a terrible thing to waste. The Quality Process of GHX invokes every person doing whatever it takes to insure that the products you require are produced to your exact specifications and delivered on time.

**Complete Adherence To Customer Requirements**

We employ stringent quality control practices in compliance with our Quality Control Manual. Whether it be vendor quality audits, incoming product inspection, in process inspection, hydrostatic or nitrogen testing, radiography or dye penetration welds, our compliance with our Quality Manual and commitment to the quality process is

100%.

Our utilization of the quality process, testing/certifications, and MIS reports detailing our performance, along with EDI and investment in cost effective e-Business channels, exhibit GHX's Total Commitment to facilitate customer requirements at the lowest overall cost

## GHX Fabrication

Manufacturing capabilities at GHX include the design and fabrication of a wide variety of industrial sealing and fluid transfer

products inventoried locally for prompt service.

GHX's products are fabricated in strict conformance to industry standard specifications,

including ANSI/ASQC Q92-1987 equivalent to ISO-9002-1987, MIL-1-45208A and

MIL-STD-45662A. All GHX welders are certified under ASME Section IX. All full penetration welds are made in accordance

to ANSI B31.3.

GHX's attention to customer requirements allows us to supply products to a variety of quality oriented companies, from the smallest pumping station

to the world's largest turbine manufacturers.
